User-friendly portal for administrator

ECS Electronics is an established international company specialised in development, manufacturing, validation and marketing of premium quality electronic connection systems for the automotive industry.

Our product portfolio includes solutions for automotive accessories, vehicle telematics and test & diagnostic equipment. In addition, by maintaining a flexible automotive manufacturing base and our own in-house Research & Development and Electronics departments, we are able to deliver customised solutions.

With over 30 years of continued improvement, we are the number one supplier of vehicle specific towbar connection systems in the European market.

From our production plants in The Netherlands, Vietnam and Poland we provide cutting-edge products to more than 20 of the biggest automotive original equipment and aftermarket brands around the world.
