

INSTALLATION SUPPORT VIDEOS June 2016

ECS Electronics attaches great value to Technical Support. We employ various Technical Support features in order to help our customers in the best possible way. It all starts with the comprehensive fitting instructions with clear step-by-step illustrations that can be found inside each wiring kit package. For any questions during the installation, customers can easily consult the FAQ's on the website or contact the free ECS Technical Support helpline.

Next to the above mentioned relevant information sources ECS Electronics now introduces the **Installation Support Videos**. The most common difficulties of the installation of a specific wiring kit are covered in a registration of approximately five minutes. Also, in the videos customers can be redirected to "How to - videos", which demonstrate standard proceedings such as **How to find CAN-Bus signals** or **How to connect the socket**.

ECS Electronics is continuously looking to simplify the installation process. With the Installation Support Videos we aim to help you reduce your installation time and therefore help you gain a more competitive position. Currently we have 8 videos available and this amount will be expanded continuously based on the input from our Technical Helpline team.

 **Subscribe** now to our YouTube channel to get the latest updates!

With kind regards,
ECS Electronics B.V.
