

# AUTOMECHANIKA 2016

July 2016

We are proud to announce that we will be exhibiting at the Automechanika Frankfurt between the 13th and 17th of September 2016. During this world's leading trade fair for the automotive service industry, we will be presenting some of our renewed and exciting products, such as:

## **INSTALL&DRIVE**

Install&Drive is a specific range of towbar wiring kits with no necessity to code the vehicle. Once the Install&Drive set is installed, you can immediately drive away. These CAN-Bus sets guarantee a seamless operation of the road lights while supporting all legally prescribed functions. Currently we have over 250 Install&Drive kits available for 14 different vehicle brands.

## **LIGHTMATE**

Our LightMates II and III are meant for checking the installation and failure diagnostics of towbar wiring kits. These diagnostic equipment tools are the most reliable solutions for both testing the vehicle as well as the trailer and caravan lighting.

We hope that while you are in Frankfurt, you will take a moment to visit us. We invite you to join us at our booth, get something to drink and chat with our representatives. We welcome the opportunity to get to know you better and show you what we have to offer to solve your challenges.

We look forward to seeing you there!

A blue banner with a halftone dot pattern background. The text is white and arranged as follows: 'automechanika' in a large, lowercase, sans-serif font; 'FRANKFURT' in a smaller, uppercase, sans-serif font below it; 'Get connected with the future of the Automotive Service Industries' in a smaller, lowercase, sans-serif font; '13-17.9.2016' in a large, bold, sans-serif font; and 'We welcome you at Hall 3, Booth H89' in a smaller, lowercase, sans-serif font at the bottom. The banner is set against a yellow background at the bottom of the page.
