Environmental Policy

Introduction

Our company is committed to environmental stewardship and recognizes the importance of protecting natural resources and minimizing our impact on the planet. This Environmental Policy outlines our approach to managing environmental issues aiming for sustainability in all aspects of our operations.

Policy Objectives

We aim to:

1. Reduce GHG emissions and contribute to global efforts to combat climate change.
2. Improve energy efficiency across all operations.
3. Transition to renewable energy sources where feasible.
4. Support and implement decarbonization strategies.
5. Aim to the protection of water resources through quality management and efficient consumption.
6. Maintain high standards of air quality and minimize emissions.
7. Manage chemicals responsibly to prevent environmental contamination.
8. Use sustainable resources and minimize our ecological footprint.
9. Implement waste reduction strategies and promote reuse and recycling.
10. Uphold high standards of animal welfare in our operations and supply chain.
11. Preserve biodiversity, prevent deforestation, and promote responsible land use.
12. Protect soil quality through sustainable practices.
13. Minimize noise emissions and mitigate their impact on communities and wildlife.
14. Engage in continuous improvement and adopt innovative practices in other environmental areas as identified.

Implementation Strategies

GHG Emissions and Decarbonization

- Invest in energy-efficient technologies and processes.
- Transition to low-carbon and renewable energy sources.

Energy Efficiency and Renewable Energy

- Implement energy conservation measures.

Water Quality, Consumption, and Management

- Monitor water usage and implement water-saving technologies.

Air Quality and Chemical Management

- Aim to safe handling, storage, and disposal of hazardous substances.

Sustainable Resources and Waste Management

- Optimize resource utilization to reduce waste.

Animal Welfare and Biodiversity

- Support practices that minimize our impact on ecosystems and biodiversity, trying to produce aim to a decrease of the produced CO₂.

Soil Quality and Land Use

- Prevent soil contamination.

Continuous Improvement

- Regularly review and update environmental objectives and targets.

Stakeholder Engagement

We recognize the importance of collaboration and transparency in achieving our environmental goals. We will aim to engage with employees, and the community to raise awareness of environmental issues and to work together on sustainable solutions.

Conclusion

Our Environmental Policy reflects our dedication to environmental responsibility and our commitment to continuous improvement. We are committed to conducting our business in an environmentally sustainable manner, for the benefit of current and future generations.
